

Nihal Pardeshi

AI Product Builder — 0-to-1 Shipping, LLM Systems, PRD-to-Production

Pune, Maharashtra | +91 7666815841 | nihalpardeshi12344@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Vishwakarma University, Pune

Aug 2023 – May 2027

B.Tech in Computer Science — AI/ML Specialization | CGPA: 8.3

Pune, India

- **Research Paper:** [Conflict-Aware Geometric Routing Network \(CGRN\)](#) — Multimodal sentiment analysis via learnable cross-modal dissonance routing; sarcasm-sensitive conflict branch with explainable per-inference reports (May 2026)

EXPERIENCE

AI Product Intern

Jun 2025 – Nov 2025

ChatMaven.ai — Omni-channel conversational AI platform · Voice · SMS · Email · LLM agent workflows

Remote

- Owned the first MVP phase of an AI-powered healthcare IVR — from ideation and user-journey mapping to initial product creation — laying the foundation for live deployment.
- Conducted primary LLM rubric evaluation research (IEEE-style) on GPT-4 scoring consistency across temperature/top-p configurations; translated findings into a PRD that was approved by senior leadership and adopted as a client proposal.
- Reduced edge-case failure rate by 20% (from ~40 failing test cases) through systematic prompt engineering, guard railing, and structured system prompting across production agent flows.
- Authored PRDs and feature specs translating operational pain points into prioritized automation workflows; aligned engineering sprint planning directly with business outcomes.

AI Quality Reviewer (Freelance)

Mar 2026

Alignerr — LLM output evaluation & quality review

Remote

- Evaluated and rated LLM-generated outputs for quality, accuracy, and alignment; contributed structured feedback to model improvement pipelines.

PROJECTS

RelayX — AI Voice Agent Platform

Nov 2025 – Dec 2025

0-to-1 Product Build · Live at [RelayX.tech](#)

- Built a 0-to-1 AI outbound voice agent for SMBs; deployed in a production clinic workflow for follow-ups processing 200–300 calls/week as an internal tool.
- Achieved 70–77% latency reduction vs. open-architecture MVP baseline through system-level optimization across TTS, LLM routing (GPT, Claude, Gemini), and pipeline design.
- Architected multi-step agentic workflows (speech → LLM reasoning → tool action), evaluating trade-offs across latency, accuracy, and cost; built outcome analytics to drive roadmap iteration.

Crowd Signal — AI Market Crowd Simulator

May 2026

0-to-1 Product Build · [Live Demo](#)

- Built a LangGraph multi-agent system simulating stock market "crowd" behavior, using GraphRAG and WebSocket streaming for real-time probabilistic sentiment mapping and explainable decision support.
- Designed the agent memory layer on NeonDB and shipped the full stack (backend on Render, frontend on Vercel) with a co-founder under a structured no-conflict dev workflow.

Khaoozy — College Canteen Pre-Order Platform

March 2026

0-to-1 Launch · Live at [khaoozy.tech](#)

- Shipped a 0-to-1 campus food pre-ordering app; processed 30+ orders in week 1 with 13–15 active early users, eliminating wait times — users picked up ready food walking from class to canteen.
- Built full order lifecycle (pending → paid → approved → ready → collected) with automated Razorpay refund logic triggered at 5-min canteen timeout, ensuring zero revenue leakage.
- Designed dual-interface product — student menu/cart/checkout and canteen staff dashboard with live order feed, OPEN/CLOSED toggle, menu management, and earnings stats.

RateMyProf India — Professor Review Platform

Sept 2025 – Oct 2025

0-to-1 Launch · Live at [Ratemyprof.me](#)

- Grew platform to 1,200+ professor listings with 1,800+ active users and 15k+ events tracked through organic adoption by prioritizing content integrity over rapid feature expansion.
- Reduced invalid submissions by 70% via automated moderation and spam-detection pipelines; achieved 85+ PageSpeed score and top-6 organic SEO ranking through data-driven performance iteration.

CERTIFICATIONS

- [Growth Skills Assessment](#) — GoPractice, Inc · Apr 2026
- [Electronic Arts Product Management Job Simulation](#) — Forage · Feb 2026
- [AWS Educate Introduction to Generative AI](#) — Amazon Web Services · Aug 2025

SKILLS

AI / LLM & Agents: LLM pipelines (GPT, Claude, Gemini) · RAG (FAISS, Sentence Transformers) · LangGraph · GraphRAG · ReAct agents · Agent frameworks · TTS solutions · Vector stores · Prompt engineering

Product: PRD authoring · MVP scoping · Feature prioritization · OKR/KPI tracking · User-journey mapping · Competitive benchmarking

Tools & Languages: Python · SQL · FastAPI · AWS Lambda/SES/SNS · Docker · Google Antigravity · GitHub Copilot · Make.com
